M1328	Canadian Rail Operating Rules (Excluding Train Order Control System and Movement by Signal Indication). Approved by the Minister of Transport, January 16, 1990. Burlington Northern began using the CROR between Blaine, WA and Vancouver BC in December, 1990. The rulebook normally came as a pocket-sized softbound book, but that would not conveniently fit into the 7-ring binder the company used at the time. This version of the CROR was done especially for BN employees but it's been a long time - I can't recall if these were received from The Railway Association of Canada in this format, or if Burlington Northern just took one of the bound books to a commercial printer and had these done. (There is nothing anywhere on these to indicate BN involvement.) Loose-leaf pages, 5.5 x 8.5, 7-hole punched.	1990-01-16	5.00

M1844	Issued by the Northwestern District of the Union Pacific (the rest of the UP used a different rulebook) to Brakeman A C Jordan, whose name is written in pencil on the inside front cover. "UP Oregon Division Block and Interlocking Signal Indications" dated April 1 1952 is pasted onto page 127. Back cover is warped and scored as if something heavy ran over it. Each suburb is described in suitably glowing terms along with lots of pictures of people enjoying the suburban lifestyle. (Today we'd call it rural.) "In nearby Springfield less than a mile from Short Hills Station ... are communities of quality homes and superb Colonial architecture. Both of these communities are highly restricted." Oops! 	SOUTHERN PACIFIC		

M1443	"Red Trains in the East Bay", by Robert S Ford. "The History Of The Southern Pacific Transbay Train And Ferry System". Interurbans Special 65. First printing, Summer 1977. 8.5" x 11", hardbound with dust jacket. A few pages with dirty fingerprints in the corners. Two name/address labels pasted on front endpaper, both blotted out with black marker. Another name written above these, in ink. Another address label bearing the name of a hobby shop is neatly applied to the back of the frontpiece. Book contains three fold-out maps, all of which have the loose edge folded back on itself about a quarter-inch. This appears to have been done deliberately and carefully, however, one of the foldouts has suffered additional folds. Something stuck pages 12 and 13 together at the bottom center; this was forcibly opened, resulting in an abrasion about 1" by 1.5". In spite of all this, the book is completely readable - no information has been lost. Pages are nice and tight. The dust jacket has a small piece missing from the bottom of the spine, and a 1" x 2.25" stain on the spine over the letters "Red Tr".	1977-00-00	100.00

M1307	"Western Pacific Locomotives and Cars", by Patrick C Dorin. Published 1998 by TLC Publishing. Hardcover. "Looks at the diverse equipment of The Feather River Route from the 1930s until the 1985 Union Pacific merger and beyond. Ideal as a modeling reference, with over 275 photos and 76 official WP diagrams covering Steam, Diesel, Passenger, Freight, Caboose and Work Equipment. 128 pages, complete with rosters and color section." "THE WESTERN RAILROADER". Published monthly by Francis A Guido. All are in good or better condition, except as noted. Most issues contain a feature article of 8-12 pages. Often, a news supplement or advertising material was included, but at this time it is impossible to tell if all is present; the magazine was apparently mailed bulk rate, without a covering envelope, a single staple holding everything together. If there is space for an address on an outside cover, the issue is considered "complete"(C). Conversely, issues shown as "complete" may be missing various inserts. Other issues were saddle-stitched and these are considered "complete", as is. Thus, a feature article, properly dated and such but without a place for a stamp and an address must be missing something and that issue is considered "incomplete" (I). Feature articles listed are always intact, with no missing pages. "*" indicates that a news supplement to the issue is known to be missing.	1998-00-00	20.00
